PERSONAL STATEMENT

Looking to secure a position in computing field to use and further develop my analytical skills and knowledge in a practical and fast-paced environment. My career goal is to assume a role which allows me to take responsibility for development of software, computer networking and data analysis for a well-respected and market-leading leading company.

PROJECTS WORKED ON

- Actively involved in the development of a Health Information System called StoneHMIS that is currently operating in 35 health facilities of level 0 to level 5 in various counties in Kenya. The system has also been implemented in Turkana and ongoing implementations taking part in Homabay.
- Currently developing a system called Stoneweb that helps linking the health providers and the patients as well as showing the patients those nearest clinics around their location. The system allows the patients to be able to book appointments with the doctors as well.
